### D30-35 STANDARD CONFIGURATION

ChipBLASTER D30-35 is pressure fed by the standard on board transfer pump, through the filter vessel, to the inlet of the positive displacement pump.

### Key Features of the D30-35 Medium Pressure Module

•ChipBLASTER Super Duty Pump

Durable enough to offer an optional 2<sup>nd</sup> year parts warranty.  
(Your ChipBLASTER ships with a standard 1 year parts and labor warranty).

•Sophisticated interaction with the machine tool

The ChipBLASTER is a process tool. Designed with automatic overload protection on the system as well as a dirty filter alarm circuit, we can insure a safe machining process without damage to the machine tool, the part, or tooling.
